

ADITYA GAUTAM

AI Engineer

singhaditya28255@gmail.com | +91-8429763300 | [LinkedIn](#) | [GitHub](#) | Noida, India

PROFESSIONAL SUMMARY

Computer Science graduate with a solid foundation in machine learning, deep learning, and NLP, currently advancing expertise through an M.Tech in Data Science. Experienced in building practical AI solutions from ideation to deployment. Strong problem-solving skills with a passion for continuous learning and innovation.

EDUCATION

M.Tech - Data Science <i>Gautam Buddha University, Greater Noida, Uttar Pradesh</i>	2025 - 2027 (Ongoing)
B.Tech - Computer Science CGPA: 7.25 / 10 <i>Gautam Buddha University, Greater Noida, Uttar Pradesh</i>	Aug 2021 - May 2025

TECHNICAL SKILLS

AI / ML: Python, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib
Deep Learning: CNNs, RNNs, LSTMs, Transformers, Model Fine-tuning
GenAI & NLP: LangChain, OpenAI API, RAG, Sentence Transformers, NLTK
Languages: Python, JavaScript, C, C++, Java, SQL
Tools & DevOps: Git, Docker, Jupyter Notebook, VS Code

EXPERIENCE

Online Tutor - Java, C++ & Web Development <i>Freelance</i>	Dec 2024 - June 2025
- Mentored 20+ students in programming fundamentals, data structures, OOP, and algorithm design. - Delivered structured lessons on full-stack web development using HTML, CSS, JavaScript, React. - Guided students through academic and personal projects, improving average performance by 30%.	

PROJECTS

Munshi - Offline Billing & GST Invoicing Desktop App <i>Python, Flask, Google Gemini API, SQLite, HTML/CSS, Pytest</i>	GitHub
- Built a production-ready, fully offline desktop billing application for small transport businesses to generate GST-compliant invoices (bilty), record payments, and maintain ledgers with no internet dependency. - Integrated a Google Gemini vision pipeline that auto-extracts bill details from a photograph and converts it into a structured digital bilty, cutting manual data entry significantly. - Shipped a bilingual (English/Hindi) UI with a guided first-run setup wizard and authentication, and protected core money & GST-calculation logic with an automated Pytest test suite.	
Material Checker - AI Construction-Material Buying Guide <i>Next.js 16, React 19, OpenRouter API, Node.js, Vercel</i>	GitHub
- Built and deployed a live AI-powered web app (Next.js, React) on Vercel that gives first-time homeowners instant, practical tips for buying construction materials. - Engineered a cascading 5-model fallback chain over the OpenRouter API with automatic retries and rate-limit handling, achieving near-100% uptime on free-tier models. - Implemented 3-layer input guardrails (client-side validation, server-side keyword allowlist, and system-prompt scoping) to block off-topic queries and prompt-injection attempts.	
AI Resume Screener & Job Match Engine <i>Python, spaCy, Sentence-Transformers, ChromaDB, Multiprocessing</i>	Link
- Built an NLP-powered resume screening tool using spaCy for entity extraction and Sentence-Transformers for semantic matching against job descriptions, achieving 88% matching precision. - Stored candidate embeddings in ChromaDB vector database enabling fast cosine similarity search across 1,000+ resumes. - Batch-processed 1,000+ resumes using Python multiprocessing, cutting total pipeline execution time by 55%.
